WHO WE ARE?

Agromillora is a Spanish multinational nursery dedicated to the production and commercialization of plants with the highest genetic and production quality technologically contributing to the development of new agronomic systems and models. We are the only global platform propagating woody species for agriculture, offering an ideal meeting place for the global community of breeders and producers.

Our vision is to become the Largest Global Platform for plant propagation and commercialization and we are already achieving it. The **Agromillora2Growth** Program comes to strengthen it, once we believe and bet on young talents to grow with our company.

WHAT DO WE OFFER?

- Join a growing company and grow with us
- Practice learning, complementing your professional preparation at the university.
- Job rotation for all operations processes.
- Mentors and Tutors following and supporting you during the program. Specialization in a specific area.
- Prepare the young professional to participate in multidisciplinary, national and international projects with other subsidiaries and to assume greater responsibilities in the future.

If you are a motivated person, want to learn and develop yourself, to be part of a dynamic team and join in with an international environment and fast-growing leading company, contributing to it, send us your application!
